DETAILED ACTION

1. Claims 1 to 27 are presented for examination.

Allowable Subject Matter

2. Claims 1 to 27 are allowed.
3. The following is an examiner's statement of reasons for allowance: The prior art made of record teaches network processing using multithread processors, For instance, Venkatachalam et al. teaches network processing for achieving high performance that includes a distributed memory and multithread processors. Saxena et al. teaches an online testing method for adaptive computer systems that includes multithread processing.

However, the prior art made of record, taken alone or in combination does not teach or fairly suggest each and every claimed feature of the instant invention which includes "performing a CRC calculation using a CRC residue produced for the previous thread if the current thread of execution and the previous thread of execution shares the same connection index," as recited in independent claim 1, and in the context of the other independent claims, the prior art fails to teach "using, instead of the first CRC residue, a second CRC residue produced for a previous thread if the previous thread of execution is also associated with the first connection index," as recited in the independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
